

AIR-COOLED LIQUID CHILLERS

Commercial and industrial applications

Compact design

Quiet operation

Variable water flow

Partial heat reclaim

30RBS

Nominal cooling capacity 30RBS: 40-156 kW

The AquaSnap range of liquid chillers pumps was designed for commercial (air conditioning of offices, hotels etc.) or industrial (low-temperature process units etc.) applications.

The AquaSnap integrates the latest technological innovations:

- Non-ozone depleting refrigerant R410A
- All-aluminium microchannel heat exchangers for the cooling only units
- Scroll compressors
- Low-noise fans made of a composite material
- Auto-adaptive microprocessor control
- Electronic expansion valve
- Variable-speed pump (option)

The AquaSnap can be equipped with a hydraulic module integrated into the unit chassis, limiting the installation to straightforward operations like connection of the power supply and the chilled water supply and return piping.
