

DUCTABLE AIR-COOLED LIQUID CHILLERS

- Compact design
- High static available pressure
- Quiet operation
- Variable speed fans
- Variable water flow

30RBSY

AQUASNAP

Nominal cooling capacity 30RBSY: 40-153 kW

The AquaSnap liquid chiller pump range was designed for commercial (air conditioning of offices, hotels etc.) or industrial (low-temperature process units etc.) applications.

It integrates the latest technological innovations:

- Non-ozone depleting refrigerant R410A
- All-aluminium microchannel heat exchangers for the cooling only units
- Scroll compressors
- Low-noise fans made of a composite material
- Auto-adaptive microprocessor control
- Electronic expansion valve
- Variable-speed pump (option)

The AquaSnap can be equipped with a hydraulic module integrated into the unit chassis, limiting the installation to straightforward operations like connection of the power supply and the chilled water supply and return piping.
