

PRECISION CABINET

For version X

- Compact footprint
- Dual-wall construction
- Fan motor assembly with EC motor (electronically commutated)
- PLC control
- Condenser fan variable speed control

50CJ

Cooling capacity: 5-55 kW
Heating capacity: 4.5-41 kW

Precision air conditioning cabinet specially designed for the air handling requirements (filtration, temperature and humidity control) of computer rooms, telecommunications rooms and specific purpose rooms (electronics, sensitive storage, medical, controlled atmosphere rooms, etc.).

Dual-wall construction. The choice of technology used (self regulation depending on the room loads, EC motor: electronically commutated) can reduce the energy consumption.

This unit is quick and easy to install, and particularly simple to use.
