Refrigerant Leakage Detect

Self Cleaning

Wi-Fi Active

Ultra High Energy Efficiency

EUROVENT CERTIFICATION:

Eurovent Certification certifies the performance ratings of the air-condition unit according to European and international standards.

3D DC INVERTER:

The indoor unit is equipped with a DC inverter fan motor. The outdoor unit is also equipped with DC inverter technology compressor and fan motor. With 3 DC inverter motors the unit achieves maximum performance and energy efficiency.

WI-FI ACTIVE:

You can control one or more units and adjust temperature, mode or schedule operation from anywhere you are, via internet.

FIVE ACTION FILTER:

The Carrier air-conditioning units with Five Action Filter provide better air quality by combining the positive effects of five different filters. The air first goes through the pre-filter that will capture large particles, dust & pet hair. The ANION filter releases negative ions that revitalize the air. The Vitamin C filter has beneficial effects on your skins strength and elasticity. The HEPA and Cold Catalyst filters absorb smaller particles and pollen and have a deodorizing effect, offering a refreshing indoor environment.

ECO-MODE:

By enabling ECO mode in cooling operation you can save up to 60% more energy compares to normal mode. The unit will automatically adjust both the internal fan speed and compressor rotation to provide you the same comfort with minimum power consumption. The function will be automatically disabled after 8 hours of operation. In ECO mode, the selected cooling temperature can be between 24 – 30°C.

SLEEP MODE:

This mode saves energy and improves night time comfort. The set temperature will increase by 1°C per hour in cooling mode or decrease by 1°C per hour in heating mode, for the first 2 hours of operation. Thereafter the unit will retain the new temperature for 5 hours after which it will switch off automatically!

SILENT MODE:

Indoor fan will run at super quiet mode, achieving extremely low noise levels.

SELF-CLEANING:

After the air-condition is switched off, the indoor unit will continue operating in dry mode for a few minutes, to clean and dry out the indoor evaporator and prevent the formation of mold.

FOLLOW ME MODE:

A temperature sensor built in the remote controller will sense its surrounding temperature. The unit can adjust room temperature more accurately to the area you place the remote controller, to give you greater comfort.
